"An effective fire response" = so there WAS fire on campus? Both the university and the president seem to be using legalistic language to avoid explicitly saying there was fire on campus while also avoiding denying it. I'm not sure why this is.

Andrew K. Benton @PresidentBenton

Finished a review of campus and it appears all is well and students, faculty and staff are safe. Early communication issues were resolved leading to an effective fire response by law and fire professionals. We are grateful. Sup. Kuehl's office played a huge, supportive role.
